HOW TO FIX PROBLEMS WITH TEXT OUTSIDE BUTTONS ?

in ISHA Meta Human Pro , in some windows versions like 10-11-11pro ??
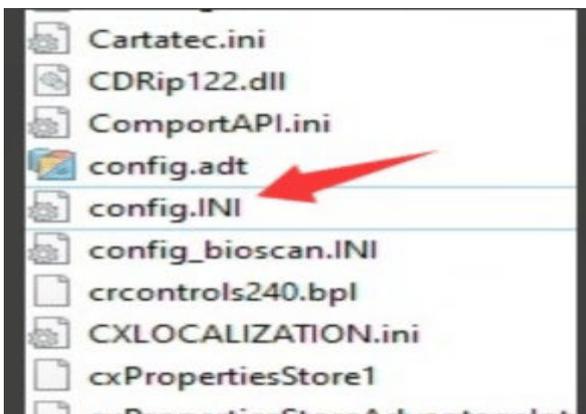

EASY :)

Dear friend,

What if you see the text appearing outside your buttons ??

There is also a FAST solution in most cases

Go to the installed directory of ISHA Meta Human Pro
There you see a file name > config.sys

open this file with notepaD or double click on it

Go to >
[Font]
Height=-15

please change to
Height=-13

13 is a smaller font
Then save the config file
start isha meta human

and check the results
